General Notice

1. Contents may be periodically updated or revised. SolaX reserves the right to make improvements or changes in the product(s) and the program(s) described in this manual without the prior notice.
2. The installation and maintenance can only be performed by qualified personnel who:
 - Are licensed and/or satisfy state and local jurisdiction regulations;
 - Have good knowledge of this manual and other related documents.
3. Before installing the device, carefully read, fully understand and strictly follow the detailed instruction of the user manual and other related regulations. SolaX shall not be liable for any consequences caused by the violation of the storage, transportation, installation, and operation regulations specified in this document and the user manual.
4. Use insulated tools when installing the device. Individual protective tools must be worn during installation, electrical connection and maintenance.
5. Please visit the website www.solaxpower.com of SolaX for more information.

Descriptions of Labels

CE mark of conformity

RCM mark of conformity

Do not dispose of the device together with household waste.

CAUTION!

- Before installation, ensure all power of the device has been cut off.
- Do not dismantle or scrap by force.
- Strictly follow the installation guide to connect cables and the enclosure must be well locked before the device is electrified.
- Unauthorized opening and cable connection will void the warranty and cause lethal danger or serious injury due to electric shock.
- Refer to the corresponding installation guide for related safety requirements when it is connected to other devices.
- Anti-static measures should be taken to decrease the damage of static electricity to electronic components.
- Keep away from flammable, explosive materials.
- All the product labels and nameplate on the device shall be maintained clearly visible.

EU DECLARATION OF CONFORMITY

WIFI EIRP: 802.11b/g/n: 18 dBm

- This equipment complies with CE radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
- Hereby, SolaX Power Network Technology (Zhejiang) Co., Ltd. declares that EMS1000 supports 2.4G WIFI, 2G, 3G and 4G functions. It is in conformity with the relevant union harmonization legislation: Radio Equipment Directive: 2014/53/EU.
- The full text of the EU declaration of conformity is available at the following internet address: www.solaxpower.com.
- Band specification:
 - » GSM/GPRS/EGPRS900: 35 dBm
 - » GSM/GPRS/EGPRS1800: 32 dBm
 - » WCDMA Band I: 25 dBm
 - » WCDMA Band VIII: 25 dBm
 - » LTE Band 1: 25 dBm
 - » LTE Band 3: 25 dBm
 - » LTE Band 7: 25 dBm
 - » LTE Band 8: 25 dBm
 - » LTE Band 20: 25 dBm
 - » LTE Band 28: 25 dBm
 - » LTE Band 28: 25 dBm
 - » LTE Band 40: 25 dBm

Product Introduction

EMS1000 PRO BOX includes an EMS1000 PRO device, an 8-port or 16-port switch, and an AC power adapter. It is suitable for use in large-scale industrial and commercial power stations for system data collection, energy control, and intelligent operations.

Installation Tool Requirements

Hammer drill
(Drill bit: Ø10mm)

Measuring tape

Marker

Rubber mallet

Wire stripper

Crimping tool for ferrules

Crimping tool for RJ45

Torque screwdriver
(Flat-head: M2)
(Phillips head: M4)

Safety gloves

Safety boots

Safety goggles

Anti-dust mask

Installation Procedure

Electrical Connection

Port and Terminal Description

Figure 5-1 Cable threading hole distribution

Port No.	Recommended distribution
1 & 2	Threading through cables for RS485 and NET connection
3 & 4	Threading through cables for switch and AI connection
5 & 6 & 7	Threading through cables for DO and DI connection

Position	Area	Item	QTY.	Description
Bottom	I	DO terminal	8	• 1-4: Reserved • 5: Only connected to the Running status (RUN) indicator of SolaX Parallel Cabinet • 6: Only connected to the ALARM indicator of SolaX Parallel Cabinet • 7: Only connected to the GRID indicator of SolaX Parallel Cabinet • 8: Only connected to diesel generator to SolaX Parallel Cabinet
	J	DI terminal	18	• 1-4: Dry contact / DRM function • 5: Reserved • 6: Connected to ATS (Automatic Transfer Switch) or diesel generator • 7: Only connected to the emergency stop of SolaX Parallel Cabinet • 8: Only connected to the water sensor of SolaX Parallel Cabinet • 9: Only connected to the SPD of SolaX Parallel Cabinet • 10: Only connected to the door sensor of SolaX Parallel Cabinet • 12: Only connected to the SPD2 of SolaX Parallel Cabinet • 13-18: Reserved
	K	Power supply (POWER)	1	12 Vdc-24 Vdc
	L	CAN terminal	3	2 × CAN-FD, and 1 × CAN-bus
	M	Indicators	8	• Power status (PWR) • Running status (RUN) • Error (ERR) • SSD status (SSD) • LED 1-LED4: Reserved
Bottom	N	Reset button (RESET)	1	For device resetting
	O	USB socket (USB)	2	For device update
	P	TF card socket (TF Card)	1	For firmware programming
	Q	Nano-SIM card socket (Nano-SIM)	1	For 4G communication

Cable Requirements

4G Antenna Installation

SIM Card Installation

Pre-power Check

No.	Inspection Item
1	Check whether EMS1000 PRO BOX is installed firmly.
2	Check whether all terminal blocks are properly inserted.
3	For 4G networking, check whether the SIM card is correctly inserted into the Nano-SIM slot.
4	Check whether the cable connection position is consistent with the design principles.
5	Make sure all unused terminals are properly insulated and do not pose any risk of electric shock.

System Configuration

1 Scan the QR code to download SolaXCloud APP and log in.

SolaXCloud

2 Create a plant.

The 'Create plant' process consists of three steps:

- Click the **Plant** button in the bottom navigation bar.
- Fill in the **Create plant** form:
 - Plant name***: Please enter
 - Address***: Please choose
 - Detailed address**: Please enter
 - PV Capacity(kWp)**: Please enter
 - Battery capacity(kWh)**: Please enter
 - DST**: OFF
- Click the **Finish** button to complete the plant creation.

3 Bind EMS100 PRO to the plant.

The binding process follows these steps:

- Click **Add device** in the top right corner.
- Select the **EMS** device from the list.
- Scan the QR code on the device.
- Enter the registration number (e.g., TESTING123) and click **Confirm**.
- Click **Next** to confirm the device.
- Go to the **Configuration** screen and click **Next**.
- Click **Connect** to connect to the device's Wi-Fi.
- Click **Finish** to complete the binding process.

Webpage Login

Connect the computer to NET 3 of EMS1000 through a network cable, or connect the computer to EMS1000 hotspot named WiFi_SN, and then go to the defined IP address based on the connection type to access EMS login webpage.

- IP address: 192.168.14.10 (wired connection); 192.168.10.10 (hotspot connection)
- User account: Username: user; Password: 123456

Technical Data

Model	EMS1000 PRO BOX-8	EMS1000 PRO BOX-16
Power Supply	100 a.c V-240 a.c V	100 a.c V-240 a.c V
Max. Power Consumption	34.6 W	39.0 W
Ethernet	10/100/1000 Mbps, self-adaptive	
Dimensions (L x W x H)	450.41 x 283.3 x 177.0 mm	
Weight	5.3 kg	
Operating Temperature	-30 °C~+50 °C	
Operating Humidity	5%-95%, non-condensing	
Operating Altitude	≤3000 m	
Ingress Protection	IP54
